

Jonatan's Peer Review:

Carlos:

Carlos's knowledge of the routes was very helpful for some of the implementation post-MVP and it helped things go smoothly. He also did a really good job communicating with other team mates when it came to integrating two different parts of the project.

John:

John was able to pick up a new skill quickly in order to improve the UI of our app. He also stayed late during meetings to help out team mates when necessary.

Sail:

Sail did a really good job at fulfilling the task that he was assigned, going beyond what was expected to make the user experience as good as possible.
