

**John:**

I think overall, John had a lot of good ideas to bring to the table, and he seemed to have thought about the problems we would face later on down the road very clearly. I think the biggest thing to work on would be to punctuality for team meetings.

**Jonatan:**

Jonatan had a lot of clear and crisp thinking that he shared with the team, and had the most experience in team projects in industry settings, which was very helpful. I think communication in terms of code design/layout would be something good to work on.

**Sail:**

Sail's a very focused member of our team, and an extremely hard worker; it shows in his attention to detail and overall crisp code structure. For Sail, too, though, I think communication regarding code design/layout would be something vital that could use some improvement.
